A
Error variance about the period mean, $V_H(m)$
10^0
10^{-1}
Reporting volatility τ
0
0.1
0.15
0.2
10^0
10^1
10^2
10^3
10^4
Expected reported cases per period, m
B
Optimal cases per period, m^*
10^3
10^2
10^1
10^0
Independent R_t, $\tau = 0$
Independent R_t, $\tau = 0.15$
AR(1) $\phi = 0.8$, budget 1,000
AR(1) $\phi = 0.8$, budget 10,000
10^0
10^1
10^2
10^3
Cost ratio per period to per case, c_0/c_1
